## Documentation Page

### Library Online Catalog/Book Lists

I have completed five different Online Library Search Book Lists using my grade level curriculum/TEKS. The five book lists were made by me and not by the students. I will print the emails/ documentation sheet and place them into my Technology Folder.

Then I will help at least 5 students create a book list to be placed in their library folder (which shows the appropriate range of their reading). The students will come to the library with their printed out book list to help them find and check out new books. If I do not have a classroom of students, I will assist 5 students from the building. I will attach a copy of the 5 student created list to this documentation or add screen shots of the 5 lists.
