TECHNO^{©LPPH}

Here are some extra rules. We have a lot of new tools on the board and some of them you may find really challenging or may take longer for you to accomplish. We have created a replace sticker that you may use one time. What this means is that if you need one square covered on your board and you just can not complete that tool, you can use your replace sticker one time to cover that square. If you use the replace sticker, it has to be with an approved tech tool. You may choose from the following list: Paperdesk app for ipad, Screenshot app for ipad, Sock Puppet creation with ipad, Sonic Pics Lite lesson for ipad, Dabbleboard, Photostory, Avatar Editor, Prezi, Glogster, or another pre-approved app for ipad or ipod from LMS. Some of these handouts are listed on the wiki under Other Tools. Some you will just have to work out on your own. You must create a lesson or use in your classroom for the replace sticker to count. A documentation page has been made.
